STUDENT RESULT - BALANCE \$150

\$70 PROFIT / DAY-1 with live account , \$70 profit withdraw day-1

This student is from Instagram.

Which scenario is better?

SCENARIO-1

Buy a residential proxy for \$100. Buy some software too. Invest a minimum of \$200 per month and try to spam on social media.

And hope to make money in your home. By the end of the month, you didn't even earn a dollar.

And keep doing the same things next month. Invest \$200 again.

Maybe the instagram/google algorithm will be kind to you this time.

And they gives you the holy grail. And you make \$1k first month by spamming too.(impossible)

SCENARIO-2

Or learn a winning strategy in a serious business.(forex)

Get a chance to communicate with a 6 figure trader.

Earn \$70 daily with fast scalps in-and-out with a small forex account.

And withdraw your profit on the same day.

Forex is risky. I agree. But if you have a system, the forex market is like a credit center for you.

As long as you keep the damage small, you will never have a problem.

This student of mine opened a live account with \$150. Imagine, even if he loses it all; that money won't hurt anyone.

He needs to lose 15-20 trades in a row to lose them all. If you are a scalp trader, you cannot lose that much in a row.

Any chance for a vouch copy? Anyways, waiting for any reviews.

Liquidity - July 28, 2022, 3:28 pm

I'll take a vouch copy of this. I'm a trader myself and consider myself versed in gold futures and gold spot markets. I will give a honest review and it will NOT be like these idiots who beg for vouch copies.
