Thread: [\[Video Tutorial\] How to Make Money Online Selling T-shirts! Sky Is The Limit!](#)

Thevoice87 - July 29, 2021, 4:36 am

Hey everyone! I created this online course a few years ago teaching people how to make money online selling t-shirts!

Video Course Is:

2 hours 41 Minutes

Highlights:

- Where to get commercial free fonts and images
- How to create t-shirts inside photoshop
- Where to buy premade designs (You should redesign them ie. change font, words etc.)
- How to dropship t-shirts

Tips:

- Stay away from trademarks and brands that you KNOW are copywritten ie. Star wars, Nike etc. (You will get your account closed and lose all your earnings!)
- Stay away from using those trademark and brand terms in your design, tags and titles. You can see what is trademarked and copywritten by google searching "WIPO Global Brand Database" go to that site and type in the term to see if it's registered. example: country girl IS copywritten. Who knew? lol
- Spy on your competitors, pretty straight forward really

You can earn literally \$5-\$50 a day or even \$100 or more a day, you just have to put in the work! Best part is, once it's uploaded you never have to do it again! ?

Cost is just 20 bytes for the link to the video course! Enjoy and let me know what you think! ?

FAQ:

- Do I use this method? Yes, one of my accounts got banned though, long story lol
- Can I really make money? Yes that why it's here ?
- How much can I make? The more you put in the more you can get out of it!
- Did you make this yourself? Yes! I use to tutor in high school, college and even online!

I don't cover that specifically no, because all the sites I mention have plenty of traffic. So if your designs are good they sell themselves.

You sure? Cause all of your posts say "thanks for sharing" and "can you share this" how can you check it out when you didn't unlock the method lol I'd recommend improving your post quality.
