Thread: [SMS Bombers](#)

chr1s_ - July 30, 2021, 3:42 am

Im not sure if I am posting in the correct sector or if im breaking any rules but I'm looking for an sms bomber / spoofer to target a few specific numbers (i have consent from the recipients) for the country code +357 (Cyprus)

I checked a few of the sms bombers here but it seems they do not support sms bombing to the specific country I'm trying to use it on, and when I ask the OP i get no response if anyone can help it would be greatly appreciated. Im willing to pay for the service

Careful with that user, make sure not to pay in advance and use a trusted MM so you do not get scammed.

yeah turns out he was trying to scam me without proving his 'tool' works :/

alapata2021 - August 26, 2021, 12:57 am

i need sms gateway as well dont know who can help

Istyny - August 29, 2021, 4:06 pm

You can text fisthack247@gmail.com for it

yeah for sure lol

alapata2021 - September 2, 2021, 3:18 am

i am also looking for sms bomber

foodog1234 - September 4, 2021, 7:18 am

message me here or on telegram (@tropicana22) if you still need this. ANY COUNTRY YOU WANT

carniwhore - September 8, 2021, 7:51 pm

I can't post a link but do try --> Impulse. Just search on Github for impulse, by LimerBoy.

it was only able to place 1 phone call and 1 text only
thank you for replying though

Managed to get quite a few SMS and OTP's pushed through on my side. I'm also using VPN to
jump to different locations and running the tool again from the new IP.

could you kindly DM me the country code number you are doing this to and I will too?
I believe my many sms bombers are not tweaked for my country, and that may be the reason as to
why any 'working' sms bombers don't work for me.

try this

It's still working tho it need a little bit of modification & tweaking.
Likely in the pip3 install -r requirements.txt

As a lot of them are outdated.

Blackval - September 20, 2021, 9:18 am

yo ya no me fio ni de mi sombra esto es jodido
