I know that WanaCry uses RSA and AES to encrypt files.

However, what type of AES does this ransomware use?

128-bit? 192-bit? 256-bit?

ECB? CBC? CFB? OFB? CTR?

True Detective - July 30, 2021, 1:58 pm

WannaCry used AES 128-bit.

But also had a RSA.

128-bit. I get your point.

How about the mode?

ECB? CBC? CFB? OFB? CTR?
