Thread: [OnlyFans Fully Automated Scraper \[Money Printing Machine\]](#)

dinosauroowner - July 30, 2021, 2:05 pm

Hi, and welcome to my sale thread of OnlyFans Fully Automated Scraper.

Below this welcoming text, you'll learn about the functionalities and the inner workings of the software.

Let's get started!

Introduction

This Scraper is a fully automated scraper which can and has been used to generate a revenue stream. It has all the features needed to run a successful making-money-while-sleeping business. The software is based on the following social networks such as; Discord & Telegram. (not limited to) It has a built-in scraper, a built-in purchasing system and payment detection for: Cash App, BTC, LTC, ETH, BCH, XMR (and way too many more coins), a fully automated crediting system for new purchases (automated delivery of the credits to the customer) and it has fully built-in cloud account generator.

Anyone who joins your server/service can start by easily typing the `prefix`help command. It will be guided through the DM on how to purchase and on how to use the software on scraping OnlyFans content.

Scraper

The software has a built-in scraper to detect & download all the content found on the content creator feed. (PPV's aren't included)

It is a simple scraper which does the job really well, but it requires updates upon changes from OnlyFans.

Payment System

The software has a built-in payment system which generates addresses through pubkeys and calculates the amount needed for each credit at the current time of purchase. (it also generates a QR code which is sent with the payment details upon customer request) Everything about the payment system can be adjusted to your own preferences.

It also has a payment detection upon confirmations (which is still adjustable depending on your preferences). And it comes with a Cash App detection system which gives customers your Cashtag and a specified note to distinguish it from other transactions. (no need to pay for Sellix)

Cloud Accounts

The software generates and verifies accounts automatically at Mega.NZ and sets them up for cloud storage. Each account gives you 20 GB of free storage & if a request is bigger than 20 GB it starts to create multiple accounts and each accounts means 1(one) link.

Leaks

Each requested creator is saved and shared with you to either your own private Discord/Telegram server so you can easily make a profit and also enjoy some nice titty pics here and there.

Watermarking System

The software has a built-in watermarking system where all the requested creators can be processed through ffmpeg and adding your own watermark to it. (this is used to increase the advertisement of your service through people who leak OnlyFans leaks)

It also has a Unwatermarked function which takes 2 credits (it is adjustable) for the request to be clean and original.

The watermarking system takes a lot of processing power but also reduces the Mega account creation because the files are compressed.

Re-Requesting Feature

The software has a re-requesting feature so even if a request fails at the time, the re-requesting feature kicks in and no customer has to worry about requesting it again until a valid request goes through.

Database

We use RethinkDB to keep track of the Time of Purchase, Credits shared through users, Payment used.

Why are you selling this?

It is indeed a REALLY nice revenue stream, but it's too hot. And I'd rather focus into myself and learning new things rather than worry about my OpSec. Can't take the hassle and risk anymore. If you're about that life, feel free to shoot an offer.

Feel free to ask any question through posting or privately. Will try to respond as soon as possible.

Looks interesting, what's the price for the whole system?

GLWS.

Currently interested in other's perspective on this project value. I am probably going to get undervalue offers but just curious.

Feel free to make an offer about it.

How about refunding me and the other customers from the existing server you own? I have 10 credits left (each credit is about \$2.8~\$3), either let me spend them and get content or refund me simply as that.

The server and the announcements he posted and the same discord he posted here.

Sadly I could not purchase, but the offer seems very reasonable. GLWS OP.

Is this due to something you couldn't do or related to something that OP is selling / promoting here?
I got a client which buys OF content once a while, I bet he'd love this. I just don't know if I can re-sell it and looking at these posts I don't think it's a smart idea to deal with OP.

Anyways, I'm open minded and waiting for either some pictures or elaboration on why you (or someone) can't buy this.

I've provided Compulsive with all the insights that I was asked about.

Seems like the reason that they decided to turn down the offer is the asking price, and even though I gave them a different asking price, they were unable to fulfill it. For personal reasons, I won't be able to continue promoting this in the upcoming days & will let it sit down forever.

My original asking price is 4 ETH.

Today only asking price is \$2k.

Middleman is welcome.

SIM-888979 - August 5, 2021, 10:37 am

Curious what is the legal repercussion considering getting the content probably involves some kind of cracked accounts or chargebacks, right? Not entirely sure how it would work.

It uses Honey extension and applies 100 OFF coupon codes.?

I understand why that is way to much for the average HF member (or scraper).

Is that really a thing? So there's no cost after purchase?

I would probably make way more than the entire HF by selling this as a story instead of selling the code itself.

My expectations were higher than the average budget of a HF user.

Don't get cocky if plans don't fold out the way you wished them to do. Good luck selling this off-site, assuming you will make millions*!

Millions = more than "the entire HF" which you claimed unrealistically.

No need to be rude, how would I know you're being sarcastic?

Clearly it involves cracked account and it seems to be the only way - if I were to buy this, would you provide a solution to get cracked accounts with payment methods, etc?

\$2,000 is not a lot of money for something like this.

EDIT: Wait, is this The Simp guy?

Lindros - August 5, 2021, 3:00 pm

How is this better than the free digitalcriminal scraping tool? what are you going to do when it needs to be updated? As digitalcriminal's tool IS frequently updated. Why would anyone give you \$2k for a tool they can get for free? (I assume it is not the digitalcriminal because that tool saves files locally.)

<https://github.com/DIGITALCRIMINAL/OnlyFans>

Please explain why your tool is even remotely worth \$2k?

FYI. OP called me brain dead for even asking him through PM's yesterday if this was the digitalcriminal tool.

I am 99% confident that this isn't a real thing. Onlyfans coupons? Girl's discount their own Onlyfans optionally. OF doesn't provide coupons for their user's content.

Link me to a working \$100 Onlyfan's coupon that works.

I think there is some kind of exploit for that part of OF but this is obviously not it, I've seen a few users selling all the content of OF models for \$2 which is well below the allowed lowest price of a subscription there.

Angela White - August 5, 2021, 6:49 pm

bro i sell an onlyfans bot that does MORE than all this shit for \$40

how is a scraper worth \$2k?

They just buy a model's OnlyFans with a limited temporary card or use a stolen card that will get chargebacked and just send you the content. They don't do anything special.

Yeah but he said \$100 coupons..

Driz - August 5, 2021, 11:55 pm

This is basically carding but covered in a coat of titty pics. That's all.

raregod - August 6, 2021, 12:19 am

yup not only that the bot doesn't work 99% of the time. I was in the discord group and the bot was down everyday... multiple people are still waiting for the refund since the owner exit scammed.

deal with caution before you pay 2k for a bot that doesn't work most of the time

My scraper is for OnlyFans managers only, not for people to perform illegal activities and steal content. I thought we were talking about downloading the vault content of an existing model that you're managing, not for stealing content.
