Thread: [help with my email spammer](#)

SIM-4910684 - July 31, 2021, 8:08 pm

Hi everyone I am new to coding and this is my first project I was trying to code an email spammer and for some reason, it won't send the email

-I've allowed less secure apps on Gmail

any help would be greatly appreciated Thanks

Code import smtplib,ssl

```
email="test@gmail.com"
password="password"
```

```
message="""
```

```
test!!!!
```

```
"""
```

```
port = 465
```

```
reciver=""
```

```
sslcontext=ssl.create_default_context()
```

```
for i in range (0,1000):
```

```
    connection = smtplib.SMTP_SSL("smtp.gmail.com",port,context=sslcontext)
```

```
    connection.login(email,password)
```

```
    connection.sendmail(email,reciver,message)
```

```
    print("Sent")
```

It worked fine for me!

Make sure your credentials are correct

(And also your code is very messy so fix that) ;)

You can try this as well works for me

```
Code
import smtplib
import imghdr
from email.message import EmailMessage
#smtp email
EMAIL_ADDRESS = ""
#smtp pass
EMAIL_PASSWORD = ""
#enter receipients email address
contacts = []

#Edit subject
msg = EmailMessage()
msg['Subject'] = 'subject here'
msg['From'] = EMAIL_ADDRESS
msg['To'] = contacts

msg.set_content('This is a plain text email')
#html letter
msg.add_alternative("""\
<!DOCTYPE html>
<html>
  <body>
    <h1 style="color:SlateGray;">This is an HTML Email!</h1>
  </body>
</html>
""", subtype='html')

#smtp server inside "
with smtplib.SMTP_SSL("", 465) as smtp:
    smtp.login(EMAIL_ADDRESS, EMAIL_PASSWORD)
    smtp.send_message(msg)
```

That's quite impressive for someone new to coding or is your definition of new different to mine ? ?

SIM-4910684 - October 6, 2021, 3:40 pm

Thanks, everyone I figured out how to do it let me know if you want the code I also made it a GUI and rotate the emails it is using

Yes I'd very much like to get a look at the code Thanks ?

hackhim - October 7, 2021, 4:35 pm

pls can someone help me with python programming. tutorials ,videos and where i can learn for self study. any referral or links will be helpful. thanks
