About

OSVPN is providing you the Safe, Fast, and Secure Dashboard in which we allow you to control VPN anywhere from your phone, tablet, or desktop. We designed our dashboard for you to be ready to change the password and delete account anywhere you would like, we have an NSA-Approved encryption system that encrypts all details. Registration is as simple as a click of a button and no details are asked when registering an account with OSVPN.

Cross-Platform

256 bit Military Grade Encryption

Auth-Generation System

Port Forwarding

Allow Blocked Sites

Say goodbye to restrictions and access your favorite sites from anywhere within the world. OSVpn allows you to settle on an IP address from worldwide servers in order that you'll fool any government or website into thinking you're during a location freed from Internet restrictions!

10GBPS Service

We are regularly monitoring and updating our servers, we've now one among the fastest Servers within the VPN Industry, Our server speeds are up to 10GBPS. Which will allow u to stream movies, surf online, and even play video games with none lag.

Bank-Level VPN Security

Secure your personal and personal data over any connection. OSVpn offers 256-bit bank-level encryption, Automatic Wi-Fi Security, and proactive VPN Kill Switch. As we understand that privacy is a serious matter for everyone, our security teams are always here for you.

DNS Leak Protection

OSVpn doesn't just protect your browsing traffic, we also protect your DNS queries. By transferring your DNS queries through the encrypted tunnel instead of relying on third-party DNS providers, we ensure that your browsing activity cannot be exposed by leaks from DNS queries.

Well that's why we don't keep any data from our clients & don't keep any logs ever. Our server are

protected & we do provide dedicated support to our clients if they face any prob.

I can't commits about this cuse i am not sure who is using my vpn server to connect HF, but i know if more then one account being used to login from same IP then that account will be closed by HF according to HF security.

So it would be good if you don;t try to connect it via a VPN.

Anyway, seems like a nice product and like you have here if what is said that you are offering is exactly what is stated, truly keeping no logs, and especially the port forwarding. If I'm going to get a VPN, I will only get one I can forward my own ports.

Hi I have a question for you, although I don't know how many problems you will encounter as a VPN service providers, but recently some VPN companies have started to offer the not yet popular WireGuard VPN protocol, WireGuard is amazingly fast although not have the test of time as openvpn. But would you consider adding WireGuard protocols in the future?

And i knew WireGuard was not designed with privacy VPN providers in mind. In addition, it leaves certain aspects (e.g. IP address assignment, key distribution etc.) to the responsibility of the implementer.

Hi, about 'zero-logs' I don't think there is such a thing. I don't know why all users who offer VPN services say "zero-logs" when in fact logs must be registered for at least 7 days

Why? Because when a user has a connection problem and reports a problem, you need to know where that problem is coming from. And for that you have to keep the minimum number of logs I had my own VPN service 4 years ago, and I had to keep a minimum of logs in order to detect problems.

Of course the logs were saved for 7 days on an anonymous server, after which they were automatically deleted.

So stop claiming that you don't keep logs, let users know the truth.

"zero-logs" only to have more sales, when in fact the logs are kept for at least 7 days

Hey buddy thanks to share your though but there is no rocket science to fix a vpn issue with connection. where any or our subscriber have issue then there is few steps only we need to make sure that is about if vpn server is working or not & rest at clients system so we provide remote support & instructions to get everything working so far.

& serving our best to our clients to have full control of these traffic without any trace. here for we say its zero log. hope i have cleared your doubt if thill you have any concerns you can connect me directly by dm or discord mate.

How does spamhaus blanklist works? is there anyway of avoiding being banned by them or how is it works?

I'm kinda of confused in that regards

Pete_Stevenson - April 17, 2022, 5:20 am

@ZeroX23: Good question.

It is evident that some CERTs are contributing to Spamhaus.

Some information they might also get from <https://abuse.ch> and their contributors.

Of course, once a trojan is on a computer, it is not difficult to find out which IPs it communicates with and which malware domains are used for it.

Hey mate, I hope you are doing well. Its true, there are a lots of VPN service provider who have a lots of servers. Here at OSVPN we provide server which our subscribers want to have if that is something we can do with. Apart from this We do provide port forwarding with our NL location server with no limit. which is our main feature so you can open whatever port you want to use to listen your program for public.

We do allow Rats & other traffic on our VPN service where we don't share any logs & protect our subscribers identity. Apart from this we don't even terminate/Suspend subscription of our subscribers even after getting abuse complaints.

So there are the main reason where we are supporting our subscribers to choose right platform for them. last but not least, we do provide tech support with remote session if there is any challenge with our solution.

I hope i have covered your doubts, Please ping me if your need any support with OSVPN Solution.

How can we trust you that you will not see our logs to your servers ?

Because 90% of company who provide VPN Service steal user data informations i am not accusing you personally, but from what i read on internet.

I can't PMor send convo, so I am gonna post here.

I bought it. You have only 3 servers active on your server status page. Even the active servers are unable to be connected to. I am using ovpn files, UDP and TCP both. Other VPN providers are connecting fine. I bought \$1 plan to see if it's something I want, and so far it's useless and waste of money. Don't take this as a review but if you have a store, some things are supposed to work without the need of the support.

Hey mate, i hope you are doing well.

Its true we have 3 Server active in OSVPN store & two of them are working with port forwarding that is NL location for Rats & black hat activity. My all subscribers are able to connect with them & they raise a ticket if face issue & we provide them support on urgent bases. i'm not sure why the VPN didn't worked for you but if you could raised a support ticket then definitely we could provide you a solution. Every VPN provider have these own way of solution to provide services. Please connect me on telegram or discord for a retest of services. you can find the link over <https://osvpn.net>

We also don't ban our subscribers even after getting a abuse complaint.

zondian1 - December 6, 2024, 7:50 pm

The Only Problem with this vpn is Speed , it's very slow with all servers Please improve that

starktonyinfo - December 15, 2024, 10:14 pm

Hi Zondian1, The server's speed is good enough; however, it depends on the location from where you connect it since once you connect, your internet traffic relays through the connected VPN server. But no worries; we will upgrade our servers for more speed.

Thanks for providing your input on how to enhance our services.

Hey Eagle404 mate, Yes all our servers are running with dedicated IP however we still recommend our clients to use DDNS to avoid connection loss due to a change of IP due to any abuse complaints.
