Thread: [Have a full time job, need a method that is fully outsourced/automated](#)

yallapapi - August 1, 2021, 12:42 pm

Like the title says. I work crazy hours but want something that I can fully outsource or automate. At least until I am making more from that than my full time job. I have experience in sales but not business. Let me know what ideas you have.

Lorem Ipsum - August 2, 2021, 2:44 am

Check for the Vouches at my thread (click Signature Space).. 1 of the 3 methods I teach is fully automated.

It takes approx 3-5 hours a month (yes, a month) to maintain after some set-up time.

Requires work, to let the 'autopilot' do the rest of the work for you.

The other method CAN be automated, but is more profitable when you do things manually.

Yet 'planting a seed' will always grow if you put it in a nice environment.

Long story short; I can guarantee you autopilot money, but you should be able to set-up things first and of course have the budget for it (excluding mentor fees, you should have \$25 - \$50 to invest. Once.)

I checked your thread. Looks interesting. Replied to you there but I'm interested in the automated method.
