Thread: [Will Maidsafe Network coin ever make a comeback?](#)

FaberCastell - August 3, 2021, 5:21 am

Those of you who were there back in the days, probably remember the OG coin maidsafecoin.

What do you think? Is this a dead project, or could it ever make a comeback? Is it still being developed or is it dead?

I think it's an example of a project not being #1 means it's closer the bottom of the barrel.

Maidsafe was a very popular project a number of years ago. But the crypto space is evolving quickly.

I just think that it's going to lose almost all its value in the next 2-3 years. I wouldn't touch it.

While it may not be a good investment(or may be), the charts looks interesting from a speculator's aspect.

Personally I wouldn't invest in it. I would prefer it as a speculation option to other cryptos though.

The moment you sell it, it will pump x10. For no reason, because crypto. But will die completely nevertheless with time.
