So im on the grind to a bond on my main account and damn is it slow. Right now I'm making pizza's and high alching anything with a profit and boy is it slow going. I am at 2.8 mill and climbing if anyone has any tips or any advice I am all ears.

It really depends on your stats but if you can mine rune ore (85 mining) and/or smith rune items (99 smithing) you can make decent profit for free to play. If you don't have the stats for those then collecting cosmic/nature runes is decent as well. Other than that, making pizzas is it basically.
