Thread: [moving a protected excel workbook to a macro excel file](#)

Snax - August 10, 2021, 6:42 am

I have 2 excel files that need to be moved to one another.

the 1st one is a workbook with about 24 sheets + clean vbaproject in .xlsb with a size of 13mb, both of them are protected with a known pass. the 2nd one is an empty macro excel exploit in .xls & can be non-encrypted with a pass if you want.

note that the output of the 2 combined excel files shouldn't exceed 20mb.

hmu on telegram if you think you can do it: @cybor9 (send me your profile link when you do)

Someone help Snax out, I had a bit of trouble doing it.

Stanley - August 21, 2021, 6:28 am

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
