Are you offering any vouch copys?

Nonetheless GLWS!

maxoone3 - August 11, 2021, 7:40 am

Hello... Please DM me let talk

Comrade - August 11, 2021, 8:04 am

If you are offering any review copies, i will accept one to review the application.

Thanks,
Comrade

Melted - August 11, 2021, 8:34 am

(Aug 11, 2021 07:40 AM)maxoone3 Wrote: [\[CITE\]](#) Hello... Please DM me let talk

If you're interested, join the telegram group please.

7 - August 11, 2021, 8:39 am

There definitely is a market for this atm.

Looking forward to hearing more about this project and I will be joining the group and checking its progress.

If I hadn't just purchased every rat currently on the market I would of purchased this instead.

GLWS looking forward to hearing more

Maxzgb - August 11, 2021, 9:13 am

I am interested to buy S - 400 RAT v3

Melted - August 11, 2021, 9:28 am

Sorry, we aren't offering vouch copies

(Aug 10, 2021 04:56 PM)hazbot77 Wrote: [\[CITE\]](#) Are you offering any vouch copys?
Nonetheless GLWS!
My apologies, vouch copies are not available at the moment

R4NS0M - August 11, 2021, 1:55 pm

Current detection status?
Regards

Mario1 - August 11, 2021, 1:57 pm

Interface is wow and ew at the same time.. Looks futuristic for a crypter, but way too childish in a way.
GLWS tho as it sounds great on paper. Give the folks a few vouch copies tho, friendly tip

Melted - August 11, 2021, 3:00 pm

(Aug 11, 2021 02:46 PM)Incog Wrote: [\[CITE\]](#) It's a RAT not a crypter, hence RAT V3.0 PRO but I get what you mean. I dont believe vouch copies are being given out due to the fact Melted is proxy selling, but not too sure

For transparency melted I reccomend you state in the thread that you are proxy selling, just a tip since some people may want to be aware of it
You are absolutely correct, I am proxy selling. I am communicating with the S-400 team for all purchases, but I will add this to the thread to let people know.

Comrade - August 12, 2021, 7:41 am

GLWS mate....?

loadman - August 12, 2021, 10:06 am

1) it is coded in which language?
2)unencrypted runtime scan on dyncheck?
3)i do not see anything unique to hold the price tag of 250\$ this is just like any other ordinary rat for sale but with a hefty price tag.

i will wait for a reply!

Melted - August 12, 2021, 10:26 am

(Aug 12, 2021 10:06 AM)loadman Wrote: [\[CITE\]](#) 1) it is coded in which language?

I am only proxy selling this product, but I will try my best to answer these.

1. I was told the RAT is coded in C.

2. I have asked the S-400 team to do this or make a video of the RAT (unencrypted) bypassing runtime on specific antiviruses, as I noticed our they haven't done so yet.

3. I understand your concerns, but this RAT is not limited to the features on the thread at all. There are many more features that I did not fit inside of the thread. I'd say the amount of features I put in the thread only account for 60% of the total amount of things you can do with this RAT. You can look into the other features in the Youtube S-400 review series. On top of that, this RAT has very sought-after features such as hvNC, Hidden Browser, and hRDP; which each come at a hefty price in today's malware market. S-400 is not a tinynuke ripoff like many other RATs in this market, which makes it unique in this category.

(Aug 11, 2021 01:55 PM)R4NS0M Wrote: [\[CITE\]](#) Current detection status?

Regards

I am simply proxy selling, so I will give you my best answer to this.

I have seen it bypass Windows Defender runtime, and multiple other antiviruses too.

The S-400 team has heard my concerns and is ready to provide a dyncheck runtime scan or videos of it bypassing antiviruses, so I will provide this as soon as I get it.

n0b0dy777 - August 13, 2021, 4:39 am

from the video hvnc module looks slow
coder need make it faster..

Mario1 - August 13, 2021, 4:49 am

That's not how you do business bro. Lack of any info, thread says "FUD", yet you really have no idea what it can and what it can't bypass, etc.

I am not bashing on your thread, just saying you're either selling a product that's not ready to be sold yet, or you're not experienced enough to sell the product and answer Q&As.

This looks more and more like a scam and the fact you've been here for 8 months doesn't help either.

Melted - August 13, 2021, 11:16 am

I am proxy selling this. I put it in the title of the thread. I put what the S-400 team told me to put on the thread.

Regarding the detection rate, the S-400 team is preparing a video demonstration or dyncheck runtime scan in the near future.

I will always accept constructive criticism, although I don't appreciate you calling me a scammer as I'm simply a proxy seller of this product.

doesn't make a HF contract with you because you are proxy selling ? That's not allowed, buyers on HF always need to make a contract with the seller, no exceptions. You should read [\[url=http://hackforums.net/misc.php?action=help\]](http://hackforums.net/misc.php?action=help)Help Docs[/url]

No offense, just a friendly reminder.

Yes I contacted a staff member regarding this and proxy selling rules because I wasn't quite sure, no response yet but I'll take your advice and start doing contracts linked to this thread.

paycost954 - August 29, 2021, 3:57 am

It is very secluded here

There is no one

(Aug 12, 2021 10:26 AM)Melted Wrote: [\[CITE\]](#) I am only proxy selling this product, but I will try my best to answer these.

1. I was told the RAT is coded in C.
2. I have asked the S-400 team to do this or make a video of the RAT (unencrypted) bypassing runtime on specific antiviruses, as I noticed our they haven't done so yet.
3. I understand your concerns, but this RAT is not limited to the features on the thread at all. There are many more features that I did not fit inside of the thread. I'd say the amount of features I put in the thread only account for 60% of the total amount of things you can do with this RAT. You can look into the other features in the Youtube S-400 review series. On top of that, this RAT has very sought-after features such as hvNC, Hidden Browser, and hRDP; which each come at a hefty price in today's malware market. S-400 is not a tinynuke ripoff like many other RATs in this market, which makes it unique in this category.

I am simply proxy selling, so I will give you my best answer to this.

I have seen it bypass Windows Defender runtime, and multiple other antiviruses too.

The S-400 team has heard my concerns and is ready to provide a dyncheck runtime scan or videos of it bypassing antiviruses, so I will provide this as soon as I get it.

Hi good luck with sells, this looks interesting quick question though can this also mine eth?

myxhacka - September 5, 2021, 8:19 am

I hope you added pop3recovery like foxmail, mailmaster, thunderbird and joinfo in future

No it cannot, good suggestion though. I'll look into it!

Stanley - September 5, 2021, 11:55 pm

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

Just curious if I buy lifetime and one day the project gets abandoned or shut down or something will I still be able to use this?

The project won't get abandoned. But assuming you purchased lifetime you'd be able to use it for as long as your HWID is the same.

Does what still work? The RAT is fully functional.

Milk6610 - September 9, 2021, 8:06 pm

Please note that theres been 1 singular vouch on this rat, which came from a brand new user who also claimed he got scammed at first.....

Be careful, would not rec buying until vouch copies are given to high rep members

We are in the process of giving a vouch copy trial. Plenty of buyers in the Telegram btw.

Hey are you sure for that it is "fully functional" ????

Veloc?ty - September 13, 2021, 7:40 am

Hello, here is my review for "supposed to be rat --> S400 RAT"

First of all this project is based on DcRAT, but this is not a problem.

Here is my first video demo on how this product works.

HVNC: <https://streamable.com/eocf6i>

Of course on the video, you will see anything on the HVNC is not working, because this is the truth!
Hidden Desktop: not working.

I have try many times with different system but it does not work, anything is broken, just the client connection is working.

Everything in this rat is a failure

<https://streamable.com/4wyxkf>

Hidden Browsers: not working.

The HRDP uses methods from venom rat with ngrok and of course not working in this rat ,as you can see in this video.

I'm tired of taking test on this complete shit rat

HRDP: of course not working too.

<https://streamable.com/a29ecf>

The stub: of course is not FUD.

in this rat all is looking good in the admin video ,but the truth is that all options are fake, for me 100% its a scam project.

People be very carefull,this rat can infect your vm and if you open the share file system of the vm then it will also infect your pc.

AND OF COURSE I DO NOT RECOMMEND IT FOR ANY REASON

don't waste your money and time with this shitty RAT be carfull.
