Thread: [\[Crypto\] DeFi Yield Opportunity - Insane APRs + Polygon/BSC Supported](#)

Ab\$olute Money - August 13, 2021, 9:32 pm

Hey guys,

I know a lot will call this bs, but ive been yield farming the past few months with great results and the key to this is to get in these project early. Ive been banking on polyBunny and QBT yield farming lately, and just found this new opportunity that could make us some nice money, and its in an LP with a stablecoin so its relatively safe.

The token is PEAR on Polygon. You can sign up here:

<https://app.pearzap.com/?r=yv44EfCE935BC0z85D9DD44BAcB397B5aA61Bf3b07>

Please consider using my link, they offer 1% of all yield rewards for referring users. Pancakebunny doesn't have anything like that.

Essentially, you need to have MATIC or USDC on Polygon, you can use this bridge if you cant use binance.com to withdraw MATIC on Polygon.

[EvoDefi Bridge](#)

Then, go to [PEAR Swap Link](#) - This is the WaultSwap link to purchase PEAR (set slippage to 3% to get it to work. Keep half your Matic to swap for USDC if you don't have any. Then add the PEAR/USDC to the liquidity pool right to the right of "Swap"

Deposit your new LP tokens here: [Pear Zap Farms](#)

Please let me know if you have any questions I will be glad to help.

Bump. Good time to hop in. Polygon defi projects are mainly down today. I got in and am up 10% on what i just additionally put in.

Here is the price chart for your reference guys:

Hey guys, I've been absolutely banking on Pear. Just check the chart since I posted this :), earned almost 70% back in interest too.

This shit is literally life changing. Please guys if you have money you don't mind playing with I highly suggest putting something into Pear.

New this week:

They added a games integration to play games with the Pear token

ADDED BSC SUPPORT!! Today they added BSC support and the APR is absolutely insane right now.

Check it out
