Thread: [How can you identify each Ethereum node?](#)

SIM-964740 - August 15, 2021, 12:20 am

Is there any way to get an id of a particular Ethereum node from a public perspective?

Like, if I find a particular nodes RPC url (behind Cloudflare for example so IP cant be found), is there any way to identify a node, like a request a node ID or something?

shreder - August 15, 2021, 6:58 am

Yep and there are ids to the nodes

<https://www.ethernodes.org/>

Thanks for the reply, I understand they have ID's, but I don't know how to get the ID of a node I am currently connected to.

Try throwing the ip address onto that site.

The IP is behind a Cloudflare wall.
