Thread: [How am I meant to get bytes](#)

PhotoGallery - August 15, 2021, 6:49 am

sooo I'm kinda new here, I posted a sales thread and I tried bumping it, but it told me I got no bytes, how am I meant to get these?

skull - August 15, 2021, 6:50 am

Bytes are given out by every thread and post you make. There are more ways, but being active is by far the easiest one I would say.

oooh got it, interesting way of keeping people active. Thanks :D

Is there a specific amount of bytes given per certain action? I'd love to read a guide for it.

skull - August 15, 2021, 6:51 am

There are also some games along the site you play to earn (or most often, lose) bytes.

Sky - August 15, 2021, 6:55 am

Check out this thread:

[Bytes FAQ || Everything you need to know about Bytes by Vitani](#)

SIM-3579235 - August 15, 2021, 6:56 am

Buy \$100 scratchcards and pray.

Dopamine - August 15, 2021, 7:33 am

Be active on HF. (Threads/posts)

You can also try your luck on Giveaway for bytes.

You can also buy Bytes into Currency Exchange subforum. Rates are pretty low atm.

account_ - August 15, 2021, 7:36 am

Post in the daily check in thread for 25 bytes, Todays check in thread:

<https://hackforums.net/showthread.php?tid=6168164>

You now got some 200 bytes with you bro...just keep on being active and do HQ postings and you will earn bytes daily. ???

If you want easy instant bytes you can just buy them.

Scoppa - August 15, 2021, 9:02 am

Sometime peoples rain on convo si if you are lucky you might can grab few k's in here.

That's a smart idea there haha.

Nate - August 15, 2021, 4:15 pm

I get all my bytes by posting, doing the daily checkin, and selling my eggs in the lottery everytime I get one.

Lyrarei - August 15, 2021, 4:19 pm

You get them from Stanley, and that's if he doesn't take them from you first.

Demize - August 15, 2021, 5:36 pm

Sports book is how I've been getting mine that and flipping in chat, and selling eggs. Mainly just being active

LeetSpeed - August 15, 2021, 10:54 pm

Just play some of the games on here you could win lots of bytes easy!

Artisan - August 16, 2021, 11:53 pm

Be active on site, post, bet your bytes in cryptogame and sportsbook and you can make a decent amount. The best way to utilize bytes for post bumping is to apply for vendor. Vendors can bump posts for 50 bytes (the lowest currently possible).

Marketplace - August 17, 2021, 1:41 am

Dayem I should start a thread asking how the bytes work

Vinavil - August 17, 2021, 3:57 am

Be active, post a lot of threads and make sure to join the daily check-in squad!

Blogger - August 20, 2021, 2:22 pm

There are many ways to earn bytes.

1. Come to [The Lounge](#) and check the sticky threads. One will be the daily check-in thread where you receive 25 bytes for checking in and you get a possibility of winning 500 more at the end of the day.
2. Killing a hackuman in the [Hackuman](#) game will get you bytes. Each hackuman has a different bounty on their head, so you can receive a few bytes or thousands of bytes.
3. Occasionally, you can find a [Lottery](#) for bytes. The host of the lottery will set an entry price, you pay the entry(as many as you want/the host allows) and you can maybe win the whole pot in the end.
4. If you have money you're willing to spend on bytes, or bytes you're willing to spend on more bytes, you can take a chance at a [Scratchcards](#). You can win bytes by spending a minimum of \$10 or 1,000 bytes. This is also a game of chance, but the reward can be high, at least 1,000 bytes.
5. If you're into sports, betting or both, you can risk your bytes in [Sportsbook](#). You bet on real life games for a chance to win bytes. You can bet as little or as much as you want, but your winnings are contingent on your wagers.
6. A good, fun and quick way to win/lose bytes is to play some [Blackjack](#). Game of 21. Pretty self explanatory. But you can bet as little as 2 bytes or as much as 500 bytes.
7. Another good, fun and quick way to win/lose bytes is to play [Slots](#). Also self explanatory. But you can bet as little as 1 bytes. There's no maximum. The more you bet, the bigger the return.

8. If you follow cryptocurrencies, [Crypto Game](#) may be the game for you. It's a simulation of the actual market, so you "invest" your current bytes in coins and you gain or lose with the actual market. If you choose to go this route, I find it best to bet and forget. Easy bytes if done right.

9. Create threads for bytes. For every thread you create, you get 3 bytes. You also get .2 bytes for every reply your thread(s) get.

10. Make a post for bytes. For every post that you make, you get 1 byte. Get discussions going. Quote people more so you guys can bounce off of each other.

11. Create a thread with a poll. You receive 2 bytes for creating the poll and 1 byte for every vote the poll gets.

12. You can buy or exchange other currencies for bytes in the [Currency Exchange](#) section.

13. There is a pink heart on every single post. This is referred to as Quick Love. If you press it, you give 10 bytes to the user that made that post. So, if you make valuable posts around the forum, people may find them helpful, useful, funny, etc. and press that heart for you, earning you 10 bytes each time.

14. I forget about this one because I don't use it much, but you can also "flip" in [Convo](#). Using the command /flip [insert number of bytes you want to bet/flip here] can get you double that number, or you lose that. You have a 50/50 chance.

GOOD LUCK!

It's a struggle bruh. Posting and getting eggs then putting them on the Lotto is one way. You can also sell your signature space in your Market Profile.

They take awhile to earn but you can always gamble.

from 80k to 2k

you don't have to tell me. I was on such a winning streak and then I tried to get it back with scratch cards lol

ailo - August 22, 2021, 8:16 pm

You can either pay for it, or earn it through posting, the check-ins or gambling.

ForBobo - August 22, 2021, 8:24 pm

Good way to get some extra bytes as well is to auction off any eggs you may get. Assuming that you don't care about playing hakumon. Usually get 1-2k bytes for a red egg and anywhere from 100-500 for a green egg average. Blue/golds are a lot more.
