Thread: [Web App cloning service \[web/desktop/mobile\]](#)

czarnylab - August 18, 2021, 11:11 am

Hi all,

I'm software developer with 6 years of experience with various commercial and hobby projects.

Currently I work with quasar framework (<https://quasar.dev/>) and google firebase to deliver cross platform applications.

If you are looking for someone to build/clone an application hit me up with a description and let's talk.

Looking for payments in crypto.

Please have a budget specified or we can do a split on profit.
