Thread: [5 Minute Guide On How To Learn Japanese!](#)

AightVision - August 19, 2021, 3:51 am

Japanese is a very interesting language.

I came across some history about Japan and their language. Before digging in to the history and how to learn Japanese i didn't spoke 1 single word. Many people say, learning Japanese from someone who speaks it 10/10 will be very hard because it will be way to fast to addapt it into ur brains. So the best is to learn it from a native speaker.

I'm really just an amateur at Japanese speaking but, i have a 5 minute guide for 10bytes to give u a closer step to learning Japanese.

This will give u the right information on what the most important aspects of the language are. And some little history about it too.

So maybe from one inexperienced Japanese speaking individual to another, this might be helpfull. Let me know how usefull it was!

Should be an issue at your end. I unlocked the AFB file and it worked for me.

Try again or a different browser perhaps. Language is in EN / US, no sacred codes or language to be found.
