Thread: [\[100% AUTO-PILOT\] AI.MARKETING // FREE \\$50 TO USE // MAKE 35% MONTHLY](#)

pingpong22 - August 19, 2021, 11:48 am

Ai.marketing is a platform that uses AI to search for current trending products and advertises it with affiliate links to potential buyers. From purchases made through robot advertisements, you can make 25-35% profit easily. Investment is necessary to earn something, if you are not willing to there is no point to even start anything.

Simple process (for beginners):

- Using this link <https://ai.marketing/en/campaign/eiksj7rc41> register to the site
- When you arrive, click Sign-Up / Sign-In (top right of website)
- Click on the Brain icon (furthest icon on left, for MAXIMUM earning)
- You'll then be brought to the inb.network log-in page
- CLICK REGISTER NOW ON BOTTOM
- You will be prompted to create a new account
- Your invite code at the top if not already there: 5b9b745
- Use your real information to sign-up, as this will also be your payout information

If you register using the Brain symbol (the inb.network) you'll be able to earn more because you'll earn an additional 5% from inb.network on all sales made.

You will get a free certificate of \$50, it will be used by your robot and the profits (those 25-35%) is yours to keep. However, you'll have to return the free \$50 back to the site at a later time.

Once logged in, you'll see your personal Ai.Marketing landing page.

On the top left and far left is your menu and options.

For your free \$50 and to activate your Robot:

-Select TOP UP on the left menu area. It will provide a drop-down to select how you wish to Activate your AI Robot (or "top up").

-Select the top method, the "Gift Certificate" option in the drop-down menu, above Visa / Mastercard. Use the code below for your free \$50

54CV-9VY8-T3RR-IUA7 // You may need to wait 48 Hours before claiming your gift certificate!

After claiming your free \$50, your robot will activate.

The robot will start using your new \$50 balance to buy ads within 48h (sometimes it takes even longer, but never more than a few days)

I recommend you do deposit at least an additional \$50 to \$70 as it will get you to the goal of reaching the first withdrawal limit of \$100.

How do you receive your Passive Earnings?

Your personal Robot buys the advertisements for you once your account enrolls in the already existing Internet Marketing Sales Campaigns the company has begun, in the back-end. When someone buys the product(s) or service(s) they market for very large clients, you will receive a small percentage of the product cost. This is your cashback, the site takes 45% of it and 55% goes to you.

The robot will invest small portions of your ad balance to advertise products for some of the largest companies in the world, each day. The more money you send in to invest for the robot to use, the more advertisement campaigns you run, and the more sales are made. Some of these clients include Walmart, Kaspersky, Norton Anti-Virus, Shutterstock, United Emirates Airlines, Nike, Adidas, and MANY, many more....

It takes between 15-90 days for the sales to be approved once the Robot begins launching campaigns. It is due to purchase cancellations, refunds, etc. Usually it takes about 20 days...

Note: Since it involves investment, let's follow the golden rule: "Invest only what we can afford to lose". I'd recommend to withdraw your initial investment and then use the profits to grow and compound them. Then if anything goes wrong you've got your initial investment back anyways.
