Anyone familiar with \$HNT helium miners ?

I was looking into buying it from black market since the Queue is like 3-6 months now, is it worth it ?
What do you guys think/ experience ?

thank you

TL;DR not worth it.

Long story -- worth it if you're in a very specific situation & location buying from specific providers with very long wait times.

Just like most things, those who got in early, banked, those who got in late, lost money
