Thread: [Trading Signals - CRYPTO - FOREX - STOCKS + CHEAP](#)

Suspect 76 - August 29, 2021, 5:39 pm

About me: I have been a trader for 5+ years now. Through out time with trial and error I think it is safe to say that I understand most if not all technical stand points about trading. I have traded in most markets so I plan to give out signals for crypto-currencies, forex and stocks but stocks will not be supported till later on.

I'm mainly a swing trader but most of the time the trades can turn into day trades.
I do not care about win-rate, I focus on the R:R (means the wins will outweigh the losses)

How many signals per week? [2-?] Minimum at least 2. Quality over quantity.

Pricing: \$25/m - price will not be guaranteed later. I plan on raising it up as soon as business goes well.

Vouch Copies available - (0/3)

TLDR - 5years+ trading, i'm a swing trader/day trader, I care more for R:R than win ratio, Price is \$25 for now. will most likely raise it up later.

Some profits

Looks good if I would be viable for a vouch copy for forex that would be ideal. If not I will wait until someone else vouches.

GLWS

tonight.

In a bit of sticky position none of us can DM because not upgraded... joke.

This is my discord.

Sounds good mate, I'll reply when i'm free. ?

scaryguy7 - August 30, 2021, 10:10 am

asked the op for a trial and he sent me the invite link.

gonna let you know how its went

monero121 - August 31, 2021, 4:11 pm

hi what free miner are you using ? ive been trying to sort one out all day and i downloaded github unsancrum today, set it to work on my laptop took of stealth mode and nothing, then i tried it with ethrum by him and nothing no cpu usage... no workers registered ,then suddenly 2 hours later after id deleted the files the file comes up using my cpu on max, i did st it to max on a couple of attempts at re building the rat, i probably re built and tried to use it 10 times over, am i being ratted inside the rat from that file or does it have some kind of delay to it...is this working for everyone?
