Thread: [AI Bot + DeFi 25% MONTHLY RETURN](#)

snaxx - August 30, 2021, 5:39 am

GokuMarket is a large Hong Kong cryptocurrency exchange firm which mainly services Europe. Mainly known for its highly successful AI Bot automated crypto investment, it has recently opened to DeFi investment.

Now they've combined AI with DeFi, and are rolling out this high capital investment opportunity for a short time on an INVITE only basis. The portfolio promises 250% return in 10 months, which is one of the highest returns I've seen on a stablecoin investment!

I've personally participated in this service and have already made back 25% on my investment in a month which I was able to transfer and withdraw very easily.

You will need a non-US phone number to sign up, but after that, KYC verification can be done with American credentials without an issue.

I personally used TextMe and got a Canadian number for free which worked fine.

Must use this invite link to sign up and be eligible for the pre-launch offer: [Link](#)

You will not be eligible for the offer without a sponsor.
