We are only selling for iOS at the moment. But i'm sure you can find some android hacks on telegram since it's alot easier to make modifications on Android than iOS

No, only for iOS dude.

(Nov 9, 2021 10:30 AM)forfeit Wrote: [\[CITE\]](#) so what you modded an IPA and then redistribute it via a dev profile or use altstore like tech to install?

Yes, it's a modded ipa file, there are many different ways to install it on your iDevice regardless if it's jailbroken, or not.

AppCake, ipawind (8\$/month) or sideloadly (free but pc required) but there are tons of different ways. We provide these kind of guides for our customers.
