Thread: [PNG to HTML/CSS](#)

InfoDealer - September 4, 2021, 11:44 pm

Greetings.

I have a website designed, that gives a pretty clear idea of what I want, however I can't deal with the frustration of translating it into HTML/CSS as I'm not very good at the front-end stuff.

If you are good at the front end stuff however, please DM me your Discord name or leave it as a reply, and we can work out a price (at the time of writing it is approximately 5 pages, some harder than other).

What I expect: Clean HTML/CSS code.

Almost pixel-perfect implementations.

Knows at least a little bit about back end technologies so you know fx. that I need a login form to POST.

Looking forward to working with you, payment can happen in crypto or PayPal.

Kindest regards
