I'd assume for use with E-Whoring. Rent out a real model, pics on demand, custom requests, etc..
Should probably make it more clear in the OP. lol

Does the massive Voluptuous female mean like a tall lady?

Pretty much, I only deal with models who are 6'6 at a minimum.

May I ask why? I have never done e-whoring, but I would think the smaller females would be of greater demand. My 500th post is about e-whoring lol.

I'm just messing with you, thought you were being sarcastic. When he says voluptuous I assume he means curvy/bigger or big juicers. I have 3 real models I use and rent, they're all under 5'8 ish. He'll "rent" the model to you for a set price \$ (usually weekly in my case) then you can directly message her for requests, when you run a premium you can get live pics and send to clients or upload it on your snap, that's usually the benefit of real models, as well as real verification to make the people think you're legit.
