Thread: [Working discord bot \[SOURCE\] paying for info on where to find discord bot](#)

Botlover - September 10, 2021, 3:18 am

I am paying for the source/info on where to find a working discord bot, must not be from GitHub

Bot must have:

- capability to post in general chat in channels that I choose
- support spintax and proxy
- have delay settings and other settings that prevent banning

Do not offer me to code one, and do not point me to people who can do it.
There are pre-existing bots people use, I'm trying to find one.

I will pay what you request, but since I'll be paying first I'm only looking for reputable members that can be trusted to have and give the info
[contract=tid]Start Contract[/contract]
