Thread: [\[METHOD\] HOW TO SPREAD SILENT MINER \[FREE\]](#)

spongebob - September 10, 2021, 12:13 pm

Steps:

1- Create a discord server

There are lot of youtube videos where you can setup a discord server very fast.

2- Create channels where you will put some cheats for games or game cracks.

Like CSGO cheats, Among us Crack (you can search on youtube there are lot of free cracks).

3- Invite lot of people on the server and grow it

wait to have 100 user in your server.

4- Start to put your miner into crack and cheat

Personnaly i use winrar sfx to hide it, in it.

5- Spread you discord on youtube, instagram or any social app

Put the discord invite instead of the download link of your crack, that will prevent you from being banned and people will stay on your discord server :)

You also have full controll to mute peoples that say they are infected (by your silent miner), and you can fake comments :)

If your youtube or insta get ban, you still have your discord server and can spread the invite on other account :)

Enjoy and leave a reply.

Hey mate thanks for the post!

If you could explain to me number 4 would be great!

You have to bind your miner with your crack or cheat. You can use this:

<https://hackforums.net/showthread.php?tid=6171837> if you want an easy way.

connector03 - September 11, 2021, 7:38 pm

But the miner should be FUD? and after binded with cheat or crack must crypt it again and make it FUD then you are ready to go right?

And even if you crypt the miner and binded it with cheat or crack .. the cheat or crack itself is not allowed by the antivirus so how can we fix this

Most kids that download cheats and cracks disable avs. You can see them.

You could also try doing giveaways for invites and stuff. And also add disboard to the server. It makes it autopilot spread without you inviting others/
