Thread: [\[FREE\] \ V0!d Pumper\(An Advanced Multi-Platform File Pumper\) \/](#)

Vinavil - September 11, 2021, 7:05 am

V0!d Pumper

V0!d Pumper is an advanced multiplatform file pumper, it has various applications, from lowering the detection rate with our "random" padding mode to just making an executable heavier to make it seem legit and/or to hide any common file stub with fixed sizes.

Requirements to Run:

GUI Version: .NET Freamework 4.8

CLI Version: .NETCore 3.1

Multi-Platform

There are 2 versions of the program the GUI version and the CLI version, the CLI version is made to run on other Operating Systems, Like macOS or Linux, additional step-by-step instructions on how to run the program on other Operating Systems are linked inside the .zip file.

Preview Picture

I hope yall will enjoy this release, if you have any issues comment under the thread or PM I'll help you as much as I can! Enjoy!

(Sep 11, 2021 01:54 PM)Incog Wrote: [\[CITE\]](#) I would use a different file sharing platform, also it requires a passphrase to access, unless I'm blind I don't see it here.

passphrase? what are you on about? the file is zipped without any passwords or protections, I am gonna update the link with a different hosting platform.

EDIT: Edited the link.

Hey mate,

Would you be interested in sharing the source code? I'd love to learn from it.

Cheers
