Transporter007 - September 14, 2021, 9:00 am

Hey guys,

Which Pool is good for Ethereum ETH Mining ?

Regards.

Voxcon - September 14, 2021, 9:08 am

If you already have an account you can directly mine on the binance pool. Just have a look at "Finance > Binance Pool > Video Tutorial ETH".

Check out <https://hiveon.net/> . Hiveon has a Linux based OS that you can use. Linux optimizes your GPU and also from what my friend tells me, Hiveon does not make you pay network fees for payout.

I am seriously confused on which mining pool should I use.

Motherboard : Gigabyte B560M DS3H
Processor : Intel Core i5 10400F
GPU : Zotac GeForce GTX 1060 6GB GDDR5 192 Bit
RAM : Lexar 8 x 2 = 16GB RAM DDR4 3200
HardDisk : 256GB Samsung SSD & 1TB WD HardDisk
PSU : Thunder 650W
Casing : Thunder with 3 Cooling Fans

Also I am using this miner:

Lmao why are you using that software? Isn't that meant for people who are trying to mine on others machines?

Mitch - September 14, 2021, 12:57 pm

I run this miner:

<https://github.com/trexminer/T-Rex/releases>

on this pool:

<https://ethermine.org/start>

Never have had any issues

Here is ethermines payout policy:

How frequent your payout is depends on how much ETH you earn.

I currently run all of my rigs with T-Rex miner for nvidia and TeamRedMiner for AMD, on the 2miners pool. Has MEV and I am very satisfied from the payments being punctually on time!

Set it @ 0.5 ETH and relax.

What kind of rigs do you have? GPU models?
