Thread: [WinExploit - Windows Exploit Rat | No Chrome Flags | Fully FUD!](#)

Coinbasics - September 18, 2021, 11:54 am

Hello,

I am selling a private method that allows you to put code into an application and execute it bypassing any anti-virus, and windows. It is an exploit in Windows. You will require minimal coding experience and Visual Studio 2019. The application does not flag on any browser and you can also have it in the Windows Store.

Proof of concept will be shown on Discord screenshare, or any alternative method that you want.

Price - 1 ETH, willing to do middleman.

Telegram: CryptoProgam

You do not need anything for this method everything is provided.

Can be scanned by any virus, run time scanner.

[contract=tid]Start Contract[/contract]

Palac10 - September 18, 2021, 12:02 pm

Why sell it when you can make a whole lot more money off this urself?

Don't have a team. would rather sell it to somebody who will put it to use.

Coinbasics - September 19, 2021, 2:42 pm

Bumping this. Still available. proof of concept can be shown and middleman is accepted.

Still available, + I'm also doing encryption services for your own rat using this method for a cheaper price.
