Thread: [XCAD - Mid-Term Profit](#)

loadedsemiauto - September 19, 2021, 10:29 am

XCAD token plans to revolutionize creator monetization by creating a tokenized economy and marketplace via the Zilliqa Blockchain.

We've seen Audius do some pretty nice stuff in the market, so XCAD seems like it has a tangible potential.

I wouldn't put some banks in there, but a short \$500 could probably turn into some sort of profits.

What do you guys think? (can't post links yet)
