have u guys seen the new face verification on [BRAND NAME REMOVED] if u do stuff and it flags ur account it forces u to verify lmao there goes [BRAND NAME REMOVED]

Build more long term traffic sources, [BRAND NAME REMOVED] and other dating sites will stop working sooner or later (unless you're a real girl, obviously).

Well even if u have a real girl they will ban the verification and photoss i had a real girl to verify bumble profiles and they detected that and ghosted me so i am sure [BRAND NAME REMOVED] will save the face in there system it only forced me to verify cause of my activity i doubt they will make it mandatory

nope, i didn't get this thing.

most people post on snapchat while driving traffic to it at the same time and wonder why they get shadowbanned lol just create the account, swipe a few times and let it sit until you have the adds you want.

This is nothing new and pretty sure [BRAND NAME REMOVED] won't trigger a face verification unless absolutely suspicious activity takes place.

Yup well this was on my personal snap and kept asking girls for there snap then it locked my account and forced me to verify it wouldnt let me do anything unless i did lmao
