Thread: [Hiring project dev \\$20/hr](#)

Marketplace - September 25, 2021, 2:50 am

Hiring a coder for the following 3 projects. The pay will be simple, \$20 per hour and 10% of the lifetime profits (paid by btc).

1. Webhosting reseller (WHMCS) I have no idea how to set it up
2. A proxy resell site - I'll provide a site which has an API to resell from
3. An SMS verification site - I'll provide a site which has an API to resell from

All projects may have a simple layout for the front end
Back-end must be functional.

Deadline would be 1 or 2 months. NOT looking for one of these high heel coders that charge 5k for a simple program or website to be made. I understand it's kind of a cheap shot, but hey we're all in for the money. You can see these as a side job that allows you to work whenever you want and create something that'll earn you a lifetime. Thanks for your time

Can I take the opportunity to do this for you? Will do it very efficiently in less than half of given deadline.

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
