Thread: [Programming language](#)

marenviss356 - September 27, 2021, 8:30 am

Hello! Do you recommend courses / books / documentation on C#. Difficult language for a beginner? I would like to write keyloggers, etc. Yeah i know, thats will take some time, don't worry. I want to learn.

Thanks for all the advice, I appreciate it!

HEXUTER - September 30, 2021, 8:58 am

I encourage you to learn any of the programming languages.

I do recommend you to begin with Visual Basic.

As for me it was super easy and you can ever practice coding keyloggers/IPGrabbers etc ..

But remember that any of those programming languages require ass for studying.

You can also begin with simple Youtube tutorials.

In addition,there are many of free courses/books ...

Good luck PM if help needed :)
