Thread: [Searching for WordPress Injection](#)

dong10 - October 2, 2021, 11:29 am

Hi,

I was doing some online research for my medicine degree and have come across a website that injected malware (PM for URL)

I am trying to retrace the source of the malware and I believe it was done using the same SocGholish method described [here](#)

If anyone could assist me in determining the source of the attack that would be amazing.
Thanks
