Thread: [Need a new FPS to play.](#)

ImChicken - October 2, 2021, 7:35 pm

Hey, so I have quite a bit of free time on my hand. I've been looking to find an FPS or any shooter game to get into with my friends, but I couldn't find any that grabs my group. Some of the games we played were CSGO, Fortnite, COD, Splitgate, Valorant. Those are some of the games we played but stopped playing because either my friends hate getting in constant games with tryhards in casual to just getting bored of the content. Appreciate all suggestions.

Try the game squad I've been playing it and it's pretty sick

OP, keeps your eyes peeled for the new Battlefield, I'm sure the beta is out this month or next!

Battlefield 2042 might be the refresher we all need.

I would recommend Escape from Tarkov its quite a bit of fun until ya know, you die.

The new Battlefield is looking really promising, pretty keen to jam it.

Perhaps Quake Champions or Krunker.
