Thread: [Looking for database of e-mail passwords](#)

SuperNeo - *October 3, 2021, 10:53 am*

Hi,

I read many times about leakage of passwords from big mail services. I need to get database of most popular e-mail passwords (not just first 100, but much more) of english and (if possible) polish writing users. Where can I get it? Thanks a lot.

Hi there,

There are plenty of compilations out there, tabulated into files known as dictionaries. The famous Seclists repository has one section dedicated to common passwords:

<https://github.com/danielmiessler/SecLists/tree/master/Passwords>

Cheers!

have you searched for "leaked email password list"?

Dumps / Combo Lists

Providing accounts that don't belong to you, whether in trades, for sale, or free, dumps are not allowed. The definition of a dump is a file with logins, passwords, personal details or emails (marketing email lists are fine). We do define "combo lists" as dumps as well.

We recommend you take the time to read the [HF Help Documents](#) section. The answer to your questions should be contained in there.
