Thread: [\[Selling\] ANTIBOT API for spammers](#)

PHPMail - October 4, 2021, 10:48 pm

Most complete Antibot available to be used for ph*sh!ng campaigns.

Features:

Whitelist/Blacklist any country.

Contains a huge database, consisting of known bots.

AI detecting bot activity in real time.

Possible to filter on ISP's.

Possible to change parimeters on any given moment.

Possible to filter on OS

Possible to filter on Browser

Possible to disable all traffic in certain periods of the day eg. nighttime.

Price: \$350 per month.

This is meant for professional spammers. If you don't know what this is, you most likely don't need it.

is this a bot.txt file that your selling ?

PHPMail - October 5, 2021, 7:55 pm

(Oct 5, 2021 07:13 PM)RichNerd Wrote: [\[CITE\]](#) is this a bot.txt file that your selling ?

No ofcourse not. This is API based, coded in PHP.

Simple to configure, you will be sent a snippet in PHP which you need to add to the top of every PHP page.

Price is per month, so the API automaticly stops working when it's not payed anymore.

Please hmu with any other questions you might have.

Not related to antibot.pw at all, doesn't conflict with redirects or firewalls. Even includes its own redirection but not mandatory to use.
