Thread: [Awards keep disappearing?](#)

Cyber Rick - October 7, 2021, 11:02 am

Kinda confused as to why it's happening but I noticed awards like for example the green apple award for having 1k+ pop keeps randomly being added and then shortly after removed from my profile. Right now, for example, it says I don't have any awards.

Noticed it was ever since I was banned for 6 months and my uber + vendor was removed. (I assume Uber just ran out but vendor was intentionally removed?)

Do you have them hidden? <https://hackforums.net/myawards.php?action=sort>

I've never hidden them but when I go there, it has an option to show them for 100 bytes. Seems like it defaulted to that or something after I got unbanned?

Oh wow thanks man really appreciate it. Seems like that was the issue too. Odd that it was set to hidden without me doing it but w/e. <3
