Also are you offering vouch copies, without so its typically hard to get sales since the user and program arent trusted
we are not offering any vouch copies, read the previous threads, your a** is not trusted, buy it and try for yourself

And 3 deals compared to 21, if you call me untrusted what are you? And I didnt ask for a vouch, I stated it's not worthwhile putting a stub up for the price of 200 when you have little dealings?
read the thread! the shellcode is updated, the builder too, all of the stubs were alright. READ THE THREADS!!!

I'm interested in this, but i have lost a lot of money crypter that doesn't meet up it's standard.

I paid this guy \$1000 for his source code and He disappeared.:

crypter seems like the easiste way to make fast money ripping people these days.

I'm even ready to buy your stub for \$100 for a try.

Thanks

show the payment! dont lie the people! if you cant prove it, get the f**k out of our thread! we have not sold our project to anyone

1. the attitude is only to the ppl who are lying like the previous comment of that guy

2. if you want to be respected, keep your attitude good and everything will be fine

it was a filter, because a lot of bots are spamming for advertisement

we are almost always active in Jabber, also the service were stopped for a while to rework the project a bit, because Windows Defender was detecting it. Its FUD again, so the offers are back up and running the Builder is in Console app at the moment, but we are going to make the changes to the one with the UI this week probably, so if you guys want, just wait for a while, till we bring back the normal Builder
