Thread: [AUTOPILOT | Website & Software to spread your rat with => *high end cards*](#)

oneheadfromdeath - October 8, 2021, 6:52 pm

Hello friends,

Today I got something special and self made, a website plus program to spread your rat/miner with.

What is it?

I made a "cheat provider" website where you can pretend to be a "upcoming cheat provider" which results in a lot of attention from gamers who would like to cheat, easy traffic right?

All you have to do is to spread your website URL and the website will work its magic.

How does it work?

So you after you completed the setup of everything you are ready to spread, this is how it works: the "loader" will download a new .exe every time they start the "loader" up which results in them always downloading the latest stub.

You can specify your download-link within the loader, so it is handy to host it somewhere you could re-upload the file whenever you got a new stub. This allows them to always download the latest file from your webhost/server

Features website:

- Register account
- Login
- Serial Key generator, only 1 per account. (Usable in the loader after they registered their account)
- Upload your stub/loader (Only for the accounts with administrator rights)
- Account management, change password/email.

Features loader:

- Discord webhook (allows the loader to send a message to your specific webhook url to notify you with new bots.

- Download stub in the background hidden from the one who opens it.
- Stop/remove existing rat/miner from system and starting it back up when opening twice.
- HWID checker, only be able to login with the account your HWID is linked with.
- Serial Key system, validating serial keys.

I would offer a vouch copy to someone I doubt you'll get much business for that price and your forum rep. GLWS though.

This idea seems good (despite you still need to do manual work and find people to talk with if i'm right). Also that makes me remember www.warcheat.com

You could post your website on multiple cheat forums for autopilot traffic, only thing you got to do is updating the stub every now and then.
