Thread: [Mate keeps deleting this post as he hacked my phone](#)

MustBeTerribleSlapHead - October 10, 2021, 11:47 pm

He done it when I let him watch a video or when I logged on his hotspot but at that point mine was no longer working. I was under the influence and my OPSEC was WOAT. No excuses. This ain't windows tho it's android and I don't even have a good enough laptop too do basic tinkering at a reasonable speed without hiccups available to me..

What are my option to get rid of him? There is a whole thing going on that I won't get in to now but it's pretty dark. No financial gain or black mail for him to be had fortunately! Not stupid enough to keep crypto online anymore (not that I'm banking ATM)

So I've done the basics twice already like android security and deleting apps. I noticed package installer 2 days ago the night it happened, so I uninstalled updates and it keeps reinstalling YouTube music and 4 other apps that I can no longer find(I'll look harder)

Really need him gone so I can recover all my stuff.

If its social media and you saved your passwords you can access them in your device settings some where he prob logged in on his device and you never logged out of all devices. He can stay in even after pass change.

Thats pretty shitty of him to do. Hopefully someone here will be able to help you out.

Ampere - October 15, 2021, 6:43 am

Change all passwords, revoke all access from other accounts (Can be done in platforms like Facebook, etc), enable Two Factor Authentication on every account possible.

If you ever have to use their hotspot again, dont. If you really have to, use a VPN.

As someone said above, that's a pretty shitty thing to do.
