Probably Mbps.

(Oct 13, 2021 08:08 AM)Shelob Wrote: [\[CITE\]](#) what do u do with a 600mb?

I like having fast speeds because 80% of the content in my house is streamed and usually it's on like 4 devices at once.

Only older shows are downloaded and watched locally.

But sometimes, in some places fast speeds isn't that pricey so it's worth having

Same here, I'm happy enough I remember the days of dial up when my download speed was kbits

Prettykitty - October 13, 2021, 10:13 am

A lot better since I upgraded from a 10 mbps plan

skull - October 13, 2021, 10:34 am

Hahah

Just tested my mobile connection in my little 2000m2 forest in my backyard... 4Mbps ???

DogeBoyFresh - October 13, 2021, 10:56 am

Most likely slow af because century link blows

Bastille - October 13, 2021, 11:53 am

Got the fiber 2 years ago, what a feeling, my last internet speed was around 2Mb/s ?

i have 40-50mbps speed at my home.

Sigma - October 13, 2021, 12:06 pm

50 down and 75 up. Is that good or bad?

Monero-chan - October 13, 2021, 12:09 pm

I paid for 300mb/s download & 300mb/s upload
my PC gets 100mb/s download & 30mb/s upload

I believe my ISP throttled my upload speed a while ago because I was hosting a server and using too much upload bandwidth

Louis Vuitton - October 13, 2021, 12:10 pm

Not as good as most I'd say?

blackrose_x0x0 - October 13, 2021, 12:22 pm

Not terrible not great. This is from a WLAN connection. Once my roommates are done working this will increase quite a bit in the evening.

Lyralei - October 13, 2021, 3:14 pm

Pretty slow, around 20 MB DL, and 5-10 MB UL.

Yin Yang - October 13, 2021, 3:17 pm

I can check on my desktop later

Beherit - October 13, 2021, 3:19 pm

250mbps Down on a good day. 23 Up. It's the standard rate for my area. The highest upgrade is 1Gbps. One day, I'll get it.

Still pretty good considering there are many people using the line.

True, it really just depends on the time of day. Sometimes it will be half of that and other times like late at night it can be double or triple that. Either way though I never really notice "slow internet" issues that affect my day to day work.

TB12 - October 13, 2021, 5:13 pm

Mine is solid

EDIT: Turns out something was wrong with my internet, this is the proper results lol

With the understanding that I run a Plex server with over 7 streams running now externally, and a YaCy instance, here are my speeds with those running;

<https://www.speedtest.net/my-result/i/4811920839>

To note I pay for 1Gbps DOWN and 30Mbps UP. I can get 780-850Mbps at my router before any device and network priority takes in affect, so this is really just a result from another device on my network after my server takes the rest up.

Mullet Muscle - October 13, 2021, 9:43 pm
