Thread: [5G Networking speeds in your area?](#)

Xen - October 13, 2021, 11:06 am

(Oct 7, 2021 05:14 AM)Java Wrote: [\[CITE\]](#) I've had slow internet for as long as I can remember. Recently I had a fiber line installed in my town. The change is so nice.

The change is nice, I'm able to download updates way faster. Things that used to take an hour+ now take a few minutes.

What kind of internet speeds do you have?
After this post that I read earlier.

I'm interested to know what sort of 5G/Mobile Data speeds you all get.

Here it's being rolled out and at a Starbucks I got the following:

Yeah, I have an iPhone 13 on the way too so I'ma see how that performs with 5G too.

Prettykitty - October 13, 2021, 11:36 am

It's like 800mbps or something if i'm close to the 5g router.

That's mental. The highest I've had is about 400Mbps

Sigma - October 13, 2021, 12:08 pm

I got the Iphone 13 and it is really fast compared to my Note 10 LOL.

Yeah, I'm looking forward to getting mine and testing it.

I've been using android for way over 10 years now.

I live in a 3rd world country. We don't have 5G.

L1l DuRk - October 13, 2021, 2:53 pm

Government in my place are still deliberating on the 5G network you can imagine. Hope we don't end back to the stone age.

I've had an iPad Pro for the last few months and I really like it so I'm looking forward to the switch :)

Surely it's gotta be installed in some places? Some governments aren't "into" it yet so it's most likely that as [L1l DuRk](#) has mentioned.

Android does have its benefits but Iphone is really neat.

xPower - October 13, 2021, 3:56 pm

5G is still a new concept in my area. Would like to see how it turns out eventually!

Lyrice - October 13, 2021, 3:57 pm

1.3k Mbps is my maximum on my OnePlus 9 Pro.

Louis Vuitton - October 13, 2021, 4:03 pm

My 5g networks are insane fast, I get a 100mbps download on my iPhone 13

Goku - October 13, 2021, 4:17 pm

Since more devices are using 5G, I'm noticing more stable connection using 4G. So, that's nice hehe

lol - October 13, 2021, 4:43 pm

Looks like 5G is faster than NBN?

Mix - October 13, 2021, 5:27 pm

I am still rocking an iPhone 11 pro max so I sadly don't get the perks of using 5G plus the UK has not so many spots and where I am at it's not around for a good 100 miles.

RTKN - October 13, 2021, 5:38 pm

i need some 5g device to test it , but in my 4g+ i got more 100+mbps

Proxied - October 13, 2021, 6:05 pm

I am on 4g and have 5g speeds.

605 Mbps download speed.
55.9 Mbps upload speed.

Yin Yang - October 13, 2021, 6:46 pm

I need an upgrade, have the XS max. And have Verizon but never see 5G

shakur123 - October 13, 2021, 7:39 pm

Hehehe we dont have stable 5g in my country, guess you guys are benefiting for this new tech cool

The best speeds I got were on ultra wide band down in the city and it peaked at 2gbs.

Monero-chan - October 13, 2021, 8:19 pm

I'm still running an iPhone 11 pro max so I don't have access to 5G but there isn't any 5G anywhere close to where I live.

KnownSyntax - October 13, 2021, 8:52 pm

Using T-Mobile on my iPhone 12 Pro Max (with 2/4 service bars), here is my 5G result from my 5G tower that is about .4 miles away.

Mines pretty similar to yours, Im to lazy to post send a screen shot to my pc to uplod lol

Xen - October 14, 2021, 1:54 am

Wow so many differences, I guess it's not very widespread yet.

This is nutty.

Haha, yeah my speeds seem to be standard for most countries with 5G

Nice! It's nice even if you don't have 5G in your area. It helps with 4G speeds too.

Yeah typically it's around 100mbs but that uwb is no joke

False King - October 14, 2021, 3:58 am

I'm literally living in a part of my area where there is no 5G coverage (yet). If I open the coverage map, it shows everything around me having 5G, just not where I live. It sucks.

grainy - October 14, 2021, 3:58 am

dont have a 5g phone but it all seems like a gimmick for now tbh

siddy357 - October 14, 2021, 5:31 am

still under trails in my country hope they roll back in coming months.

Yeah, it's very useful to have while roaming around a city.

If they can get the infrastructure in less populated areas then it'll make life much easier for those with poor internet.

Eran - October 14, 2021, 10:54 am

5G is not available in my area yet, they are just putting the towers now.

Sick, you'll be roaming at high speeds in no time.

You just need to accept it and let him slide into whatever he wants to slide into.
