Thread: [COINBASE INSIDER LISTING | MILLIONS MADE OVERNIGHT \[LIMITED\] \[LEGAL\]](#)

shreder - October 18, 2021, 3:03 pm

This is clear cut, you will learn how to know Coinbase listings before the public does with my method. It's 100% guaranteed that the coin will be listed. We are talking about hundreds of thousands of dollars of profit if not millions.

There is a discounted vouch copy/review copy available. This is the real deal.

I'm only selling 5 copies of this and they start off at \$25,000.

Payment Options: Crypto
\$25,000 Review/Vouch Copy
\$50,000 Second Buyer
\$100,000 Third Buyer
\$150,000 Fourth Buyer
\$250,000 Fifth Buyer

Called recent ARPA, AUCTION, & PERP Listing

By purchasing this method you agree to the following ToS.

1. I have the right to refuse sales.
 2. No refunds
 3. No leakage
 4. You have read and will abide by the ToS.

vouch copy for 25k?

Sorry, but for one, how long is this method guaranteed to be reliable?

Secondly, we are taking a RISK on investing into a coin that HOPEFULLY is added to Coinbase.

1k vouch copy max.

Or, just let me check it out and I'll let the community know what's up with it.

Just my two cents. Besides that... this is some golden information. Shit like this just doesn't last very long though.

Regardless, obviously it sounds like you don't want the information leaked.
At the end of the day, I can buy the copy for 25k all day, and Coinbase will pay me more for being a whistleblower. Not trying to blow anyones high here... let's just think realistically.

OP... sell it to one person. 100k.

You still need someone to vouch though. ;)

Yeah good luck selling a product for 25K with no vouches.

SIM-4831178 - October 18, 2021, 4:03 pm

What if I show proof of funds(like big amount) and then we can have a deal of sending you payment as I profit?

xc0z - October 18, 2021, 4:29 pm

Skeptical of this because I'm extremely familiar with this space and have access to a wealth of information related to this.

No one knows whether or not there's going to be a listing on coinbase with a 100% conviction, unless you're the CEO or you have an insider who works there. There's publicly available listings of coins and what's likely to be listed, but there's nothing that's concrete. Do not fall for this.

OP, if you can prove to me you know when a coin is getting listed - provide an exact DATE and time it'll get listed, to the public, on HF. If you don't want to go down that route then message someone reputable who has shown PoF and they /must/ confirm this through DMs or Discord with a timestamp that's screen recorded.

Paging Dr. [mention=3209658]

I think you should grab that vouch copy.

Beaks - October 18, 2021, 4:50 pm
I can show proof of 100k+ if you are willing to use middleman.

Can do \$10k USD after first successful deal.

rockchuck 1 - October 19, 2021, 6:05 pm

interested in seeing how this develops... can also provide proof of funds but won't stake 25k upfront.

Vitaly - October 19, 2021, 6:16 pm
your proof is hilariously bad

yeah all the people that havent bought?

Huffington - October 20, 2021, 10:44 am

Following as it seems interesting but kinda out there lol

Dorrance - October 20, 2021, 11:06 am

Can we see proof of millions.

Bench Press - October 20, 2021, 11:12 am

Never would I be able to afford something like this, but I am curious to see if someone does buy this and how it goes for them.

UnoOne - October 20, 2021, 11:24 am

LOL..it takes liitle effort ,just following coinbase on social media and coinbase blog

or if you are too lazy check this and can short list the future coins that will be listed on coinlist
The info the OP is selling not wroth even \$100

And where exactly do you see perp or arpa on there?

Try harder next time. Nothing involving following coinbase social media or blog.

??

Yeah, not very professional user title. I have my doubts, but GLWS

(Oct 20, 2021 11:34 AM)James Wrote: [\[CITE\]](#) Are you getting the intel from people who work at Coinbase with direct knowledge of new listings, or an outside source?

The intel is completely legal meaning no insider intel from workers/coin project is involved, it isnt gathered from third party source, and its not gathered from the typical methods of their blogs/wallets/new pages as others have speculated.

Envy - October 20, 2021, 1:05 pm

I mean you must've expected these reactions posting this for \$25K upwards of \$250K for a copy?

You won't get a single sale with this. Or you'll get the one and fuck off lmao

~HF~ - October 20, 2021, 1:28 pm

I'm sure you already know this so not sure why you listed a vouch copy for \$25k but you should really offer like \$1k vouch copy on one listing call or free vouch copy on one listing call. Then the person can vouch and you can actually make sales. This way you only give out one call for free or cheap you don't need to continue giving them listings.

Just some advice if you are actually serious about selling this as I'm sure you know and most people here know no one is gonna just give you \$25k without any solid proof and vouch from someone else.

Even maybe suggest reaching out to an MM so they can hold the \$25k and if your listing call is legit then the MM pays you the \$25k and the reviewer can vouch for you.

denz - February 2, 2022, 8:21 am

Is it still available for buying

flyingduck - February 2, 2022, 9:31 am

lmao. well. not too hard to find out if you have a few active braincells.

also, the pricetag is kinda ridiculous. limiting sales and that pricepoint makes absolutely no sense. if you have more sales, the probability of a pump goes up. i had a plug for new listings a while ago, in short: not every coin will go up.

anyhow, glws.

DaPlato - February 2, 2022, 11:12 pm

I've never thought so hard about pulling the trigger on something..

618C - February 3, 2022, 12:09 am

lol GLWS for these prices, i doubt this will get off here
