Thread: [\[Selling\] All of my Twitch Bits](#)

medicinalmac - October 19, 2021, 2:51 pm

Selling all of my twitch bits, running a twitch bits service unless I end up selling my whole stock.

Current stock is: 569,000 bits.

Willing to sell them for 3\$/1k

[contract=tid]Start Contract[/contract]

Sold 113k bits so far.

Just out of curiosity, why can't you create a twitch streaming account and donate all the bits to yourself?

Twitch will only payout depending on how active your channel is/followers/live viewers etc. Donating 5k\$ to a new affiliate acc with a few viewers is an instant red flag. Would just take me too much time to create multiple affiliate accounts and shoveling the bits out in small batches. That's why I'm willing to let go of the bits for a major discount.

Have you considered trying to get into contact with larger streamers in return for a cut back? Or maybe some tier 3 Pokimane subs (lol)

Haha haven't tried, little hard when I'm relatively new and not much vouches.

Right, well either way, this is an amazing deal (\$3 for \$10). Best of luck with sales.

Are the bits sent from same account, or in multiple accounts?

The bits originally come in a code where you can choose for me to either give you the codes for you to redeem on any of your accounts so you can spend them on whoever (including cheering yourself)

OR

I will cheer them to your channel anonymously, I can do specific amounts from different accs/proxies for each individual account.

Any risk involved? As far as getting your account banned/suspended? Curious.

No bans, only risk is twitch not paying you your revenue. Just have to be smart with the amount of bits you're giving yourself.

Ask some of your hackforums contracted customers to put a vouch on the thread, use less caps also, laters.
