Thread: [Scraping "evolution gaming" live roulette?](#)

SkunT3llo - October 20, 2021, 3:28 am

Hello fellas,

I started to program scraping bot for analysis of live roulette by "evolution gaming" and I stuck on beginning?...

Basically I need to scrape last 12 numbers on roulette but it doesn't work with selenium, I also tried beautiful soup and I'm still struggling.

Can anyone please help me and tell me how to scrape last 12 numbers from any table using chrome and web tools (not GUI)?

I would appreciate it so much!

BTW I'm using bet-at-home site for "playing".

I guess first question would be, have you contacted them to see if they have a API?

If not, maybe post the json from the HTTP response? I don't think I can make an account on that site because I live in an area in the US that doesn't allow gambling.

Lol, tbh I don't think they would like to hear what I'm trying ?...

888casino is also one that I use but I prefer more bet-at-home, so if You can check it (again) I would appreciate it so much.

I don't live in New Jersey so I am not allowed to register to play for real money.
