Thread: [Incorrect Award Total](#)

TB12 - October 20, 2021, 1:24 pm

I was on this [user's profile](#) and I noticed that the number showing their total number of awards was off. Assuming this is a bug? I haven't noticed this on anyone else's profile though

Sky - October 21, 2021, 4:58 am

Nice find. Surprised it hasn't been noticed before now.

Still bugged from my end.

Links been in the OP since the thread was made. It's a named link "user's profile".

(Oct 23, 2021 04:58 PM)xadamxk Wrote: [\[CITE\]](#) I already referred to that. It worked for me. I wanted the other profiles :)
What other profiles?

Not on this thread they haven't. Just the profile in OP and a member who posted about themselves being one off.

It was also talked about in convo too when this was first posted, so yes, multiple members have confirmed the issue on MULTIPLE profiles.

Leave me alone bro lol

I'm just trying to find out what profiles you're looking for. You're asking for links to profiles for the messed up award counts, but you're aware of the two in this thread so the question is what other profiles are you talking about?

OP shows correct for me.

Your show incorrect for me.

Only similar situation I remember was some bug with the Lotteries where it would end up giving you a white diamond award (as it was the default one) if the lottery ends and nobody buys into it.

The diamond awards were removed eventually, and the bug was fixed, but the counter wasn't tho.

You can see it on my profile as it says 40 Awards, but there are only 31:

I also remember [webdev77](#) was testing that bug himself, and he has the same counter issue with it. Says 13, when they're 11.

The difference here is that the ones i listed show a higher counter than the real one, when the one in OP shows a lower number, so i'm not sure if they're related in any way.

Yeah I see that, I have a couple hackuman eggs but on my end my award total is correct

I remember mentioning this a long time ago and I cant remember what was said back then about the whole thing but I think it was something like its not important enough right now to be fixed as we have bigger updates coming.

That's the HF motto for development and issues.

The fact that you see it correctly, but I still don't, boggles me. Even with my own browser cache cleared, it still shows incorrectly. So it's not local cache, probably also not cached server side (unless all profile pages are cached per person who visits it, which I doubt).

Man, I love these kinds of bugs.

Nostre - October 27, 2021, 8:10 pm

I've seen quite a few profiles have an incorrect award count. I don't think it's a huge issue though.

If I come across any in the future, sure.

Ninja™ - October 27, 2021, 10:43 pm

Its still showing 6 to me, when it should be more.

Night - October 27, 2021, 11:41 pm

Happened to my profile too. I believe it happens when you hide your awards, then get an egg added to your awards.

That's a new award cache issue. I believe this was a different thing.

Omniscient - October 29, 2021, 1:16 pm

Fixed. LMK if you find any new profiles with award count mistakes.
