Thread: [Need hacker for a yahoo email](#)

Captera - October 21, 2021, 1:00 pm

Hello forum. I was recommended here after one of my computer buddies is too busy to help me with my request.

I need access to a Yahoo email with 2fa, a gmail with 2fa, a tiktok with 2fa, twitch with 2fa, discord with 2fa, and possibly instagram with 2fa. However, I think I have a way to access all the accounts with just access to the Yahoo if that is doable.

I know this person who is not a good person. They are a minor who catfishes of-age guys, rumor starter, liar, cheater, overall very manipulative. I have proof of them DOXXing people in a discord server with over 5k users.

I know their address, emails, accounts, old passwords as we used to be friends at one point...ha..they were fake as fuk....problem is they recently turned on 2FA and hanged their passworda due to becoming internet famous. One of their stupid staged skits went viral. Their account got temporarily banned for harassmnet and bullying, bit ban was lifted :(

I want to delete all the social medias associated with the DOXXing. If they become interent famous again, so be it, it is meant to be. But I dont think bad people deserve fame when they are fake asf.

Do you accept to use a middle man and a contract here? It would do some good to your horrible reputation.

I already had someone named Volcan do this. He took the first part, 100 out of 300 and never saw him again.
Sorry no

Unfortunately my friend, i wouldnt trust any middle man in these things....I've been scammed out of 300 using a middle man and that totals my attempts to 900 i've been scammed out of :(

if only people were honest like you were. i don't get what's so hard to make a solid business transaction

Ayena - December 29, 2021, 1:13 pm

Did you use a reputable middle man? I think for things like this, it's just very hard. I also was scammed, but you're likely better off learning how to do it yourself at this rate.
