Heres some of my most recent work I have done in the last 2 days
Please rate these for me,
Thank you

Looks great! My opinion on the 3rd would be to move "WELCOME" behind the character. It will put more focus on the "USERNAME". Overall looks good!

Pretty cool I'd say, it's been quite a bit since I've dabbled in GFX like this. Overall I'd say super eye catching and well laid out. Good amount of clutter but surprisingly not too overwhelming.

Thank you I did have it originally like this but the character took up a lot of the text and made it a little hard to read
