3-5 vouchers are given. Post why I should give you one! -20% OFF if you write a report on how you feel about the cheat. (First 2-3 people) I'll post a video tomorrow, showing the aimbot and ESP better. [contract=tid]Buy license right here # you can private me before buying![/contract]

Remember discounted are available, and this the most affordable and best for absolute legit smashing.

Once I see a vouch on this cheat I will purchase it. Valorant cheats are risky. You can easily be banned and not many people have ways of getting around it particularly well.

Has been undetected for a month and 7 days as of right now, and had private cheat for Warzone when I used to play it, only ESP, and that was good for 4 months that I played for. obviously different games, different security but every build is unique, and I really believe in the product, that's why I offer a 70-100% refund if it gets detected during your license, but to be honest, might lower it to 50% since using cheats is always risky and no another provider provides anything similar from what I've seen.

Constantly updating it as well. I think it will stay undetected, at least for a long time. One or two has bought I don't remember, and plenty of vouches are given in a second.

I'm interested in reviewing. I play this from time to time and wouldn't mind testing this cheat to see how it performs and holds up against the anti-cheat

I'll wait till tomorrow at least to see if more people are interested in a vouch.

Have you cheated in other games before? Or have a general idea like what is ESP, what is aimbot, and what makes one bad and one good.

No problem.

Yes, I have, and I'm familiar with all the features offered with this cheat. As far as establishing my opinion on if this is a good or lousy cheat would involve me running a series of tests with each function to see if they perform as intended and their detection, if any, while in use.

is this external or internal?

Kind of my thing. I don't develop mods or anything like that but I have used quite a bit. Most recently warzone mods.

Okay, I will give you a vouch. Posting here so I remember. You could also add my TG & DC, so we can communicate easier.

A unique way of working, from what I've seen.

Also add my TG or DC for easier communication if I have happen to pick you. Today I will pick, or tomorrow.

I plan to run this for months, my site is just getting started but I plan to make a better one as soon as I have time and upload my cheats there and advertise them outside of this forum too. Since my CS:GO cheat (same features) is also coming out today/tomorrow, its been ready but have to do a little fix, haven't got time yet.

So is this yours or are you just a reseller? Your context is a bit confusing here.

If reseller when was the last detection?

I have another tool scraper made by me, and CSGO cheat is on the way.

I have a thread where I offer coding services too, and currently doing 2 projects.

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
